IMM WELCOMES EMERGENCY MEDICINE PROGRAM AT METHODIST HOSPITAL

(Henderson, Ky.) July 12, 2017 – As of August 1, 2017, Island Medical Management (IMM) will provide physician management and staffing services to the emergency department of Methodist Hospital, a community-focused health center located in Henderson, Kentucky.

Methodist Hospital was first founded in 1946 in Western Kentucky. Today, the facility consists of two hospitals, including a 192-bed hospital in Henderson, and a 25-bed critical access hospital in Morganfield. It is the hospital's mission to partner with its medical team to, "...place an emphasis on safety, compassionate care, high-quality health services, and affordable treatment options in order to address the mental, spiritual, and physical well-being of patients."

On average, the emergency room at Methodist Hospital sees 30,000 patients a year. The ED is staffed 24/7 by physicians and nurses ready to receive and immediately treat patients in critical condition. In its efforts to ensure local, comprehensive care to their patient community, Methodist Hospital continually adds to its staff and outfits the facility with new and improved medical equipment.

"IMM is pleased to expand our relationship with patient communities in the state of Kentucky. We are excited at the opportunity to partner with the physicians and medical staff of Methodist Hospital, and look forward to improving the experience of patients seeking treatment within the emergency department," says Dr. Donald Brock, DO, FACEP, Regional Medical Director of IMM.

Island Medical Management (IMM) is a clinically led, physician owned, and privately held organization with nearly 25 years of management experience. IMM's unique model offers every advantage of a local community based group, backed by the resources of a national organization. The group currently provides services to over 170 hospital and post-acute programs throughout the United States, with more than 3 million patient encounters each year.
